

# Elevate Your Aquatic Research with Iwaki Aquatic Support

Driven by Quality,  
Powered by Expert Technicians

Whether you use our systems or another brand,  
we provide end-to-end service and support for your lab.

## Technical Support + Service Plans

Personalized, proactive support from start to finish

- New equipment installation & commissioning
- Semi-annual & annual preventative maintenance
- System diagnostics, control upgrades & repairs
- Fully customized service plans
- Rack System design
- New equipment installation
- System-specific maintenance checks
- Elevation drawings & flow diagrams
- Installation coordination

## Trusted by Leading Research Institutions

Aquatic facility management experience and an educated staff is crucial in a biomedical research laboratory. We bring our precision and strategic planning to help make your lab a success.

**Iwaki Aquatic** delivers fully integrated aquatic housing and rack systems tailored to the needs of modern research labs. Our team of biologists, aquaculture specialists, engineers, and service technicians ensure your lab runs efficiently with reliable systems, expert support, and long-term service plans.

“Not only were they pivotal for our shark project, but we rely on Iwaki for the majority of the maintenance on our zebrafish systems throughout our institution.”

## Aquatic System Training

We don't just install equipment, we empower your team with the knowledge to run it smoothly.

- On-site training & complete system manuals
- Water quality management tools & automation
- Full support through planning, installation, and operation
- Long-term maintenance & performance upgrades

Your Premier Partner  
for Aquarium System Services, bringing proven  
expertise and reliability to your research environment.
